

## Holiday voucher bookings up by 34 pct in 2021

**Bookings with holiday vouchers have increased by 34 pct this year, yet a considerable number of such vouchers remain unused, according to a study by the hotel booking platform Travelminit.ro, conducted with Sodexo, sent on Friday to AGERPRES.**

Compared to 2019, more and more Romanians have chosen to pay for their stays using holiday cards, in June and July of this year there was a 34 pct increase in bookings paid in this way.

However, the same study also reveals that a considerable number of such vouchers are still unused.

Although the summer season has already started for more than a month and a half, and beach holidays are among the most sought after, Romanians also prefer cooler stays in the mountains. Among the main reasons are mountain landscapes, local cuisine and outdoor activities: picnics, forest bike rides, mountain trails, hiking and other seasonal sports.
