

Marius Antonie is the new Associate Partner in Consulting line of services, EY Romania

Marius Antonie is the new Associate Partner in our Technology Consulting practice. In his role of Digital Transformation Lead and Head of Intelligent Automation CoE, Marius will enhance our existing capabilities in the area of Intelligent Automations taking hyper-automations to the next level of digital transformations, extending the use of cloud and new technologies and leveraging on partnerships with technology vendors. He will focus on streamlining and structuring EY's emerging technology delivery capabilities, taking advantage of his large previous technology consulting experience.

Marius has almost 20 years of professional experience in the areas of applications development and technology consulting. Throughout his career, he led large Telco projects managing them throughout their entire lifecycle. He is experienced in the delivery of large projects in international environments, including offshore delivery centers, covering areas like Application Development, Application Operations and Infrastructure Operations.

“Marius will leverage his depth of experience in applications development and technology consulting to accelerate the growth of our digital transformation and intelligent automation capabilities in Romania, and to expand our ecosystem of technology partners to consolidate EY's position as a trusted technology advisor”, says **Peter Latos**, *Consulting, Strategy and Transactions Leader, EY Romania*.

Aurelia Costache, *Partner, Consulting, EY Romania, EMEA Intelligent Automation Leader*: “We are glad to welcome Marius in our Center of Excellence for Intelligent Automation. We are strengthening our team and capabilities for continuing to assist both local and international clients in Hyper-automation projects as part of wider business transformation projects.”

He spent the last 13 years with Accenture Technology, being part of the local leadership. Marius Antonie owns a Computer Science degree and he is specialized in Applications Architecture and Systems Integration, with focus on telco industry.
